

Boomerang 2

Chart-View Reusable Temperature Recorder

Actual size: 5 1/4" x 2 3/4" x 1"

Chart-View Reusable Temperature Recorder

Boomerang 2 combines the versatility of a reusable temperature recorder with the convenience of a built in high-graphic temperature chart display.

This unique digital temperature recorder is an ideal instrument for monitoring cold storage warehouses and refrigerated truckloads. These reusable temperature recorders eliminate the need to repeatedly purchase single-use temperature recorders. Additionally, the temperature chart can be viewed immediately without the need to connect the instrument to a computer or reader.

Maximize Efficiency

Boomerang 2 can bring new efficiency to internal Receiving/QA/Food Safety operations. The high-resolution chart is viewable at any time during the monitoring session. This unique feature enables quick

scheduled temperature checks with the touch of a button. **Boomerang 2** can monitor temperatures for up to 180 days continuously. All temperature data can be easily downloaded and archived using Cargo Data's free **KoldLink App** software.

Features:

- Saves data from multiple recording sessions for future download/save/print
- Embedded unique serial number and cycle counter
- Boomerang 2 can be manually reset unlimited times
- User customizable ranges, LED alerts, and locating beeper
- Downloads directly to computer using standard USB 2.0 mini cord
- Free **KoldLink App** software provides chart viewing, detailed management reports, email, and **UpLink** cloud-based data sharing
- User replaceable battery (CR2450)
- Approx. battery life: 6 months
- View chart and detailed data at any time during the monitoring session
- Supports use of external temps sensors and probes
