

Express Use Instructions: RF Enabled Temperature Recorders

RF Enabled Units: Cargo Data's *Select RF* and *Boomerang RF* temperature recorders are Radio Frequency (wireless) enabled --no need to manually insert recorder into *Express*. Data can be transmitted up to 300 feet line-of-sight. Simply press and hold the "RECEIVE DOWNLOAD" button while in range of the recorder. *Express* will first seek iMAT equipped trailers, then it will seek RF-enabled temperature recorders. Data from the recorders will be downloaded wirelessly. *Express* will provide download status indicator.

If more than one RF-enabled temperature recorder is within a 300 ft radius of the *Express* handheld unit, *Express* will data from all recorders in range. Temperature records are identified by the unique 6-digit temperature recorder serial number which is on the white sticker on the face of each recorder.
